INDEX TO VOLUME XXXVII

The asterisk * preceding the page number indicates an original article in the Journal. The letter T preceding the page number indicates a paper reported in the Transactions of the American Association of Neuropathologists. The letter D preceding the page number indicates a discussion of an original article or some other item published in the Journal. The letter B preceding the page number indicates a book review. Subject entries are made for all articles. Author entries are made for original articles and Society Transactions.

A23187, use to demonstrate role of intracellular calcium in causing ultrastructural damage in mammalian muscle, 544
Abbamondi, A. L., see Macchi, G., T652
Aberrant dendritic and synaptic development in immature human brain, T578
Abnormal glycogen in diabetic nerve and kidney, T674
— neuronal migration, deranged cerebral cortical organization, and diffuse white matter astrocytosis of human fetal brain: a major effect of methylmercury poisoning *in utero*, *719
- tublin aggregates induced by zinc ions in organotypic cultures of nerve tissue, T616
Absence of hematogenous cells in the normal brain tissue as revealed by leucocyte-specific immunofluorescent staining, T615
Accumulation of dihomo-gama-linolenic acid in blood and cerebrospinal fluid, a novel neurological disorder, T675
- of esterified cholesterol in the brain, a sequel of extensive softening (lipid histochemical study), T672
Acid maltase deficiency in tissue culture of Pompe's disease, T609
Activities of neural tumor hydrolytic enzymes, T677
Acute demyelinative encephalomyelitis following herpes simplex encephalitis treated with ara-A: an ultrastructural study, T643
